

Aprendizaje Bluebonnet Learning Destrezas fundamentales K-3 Publisher Response

We wish to thank the Texas Education Agency, teams of reviewers, and members of the public for a thorough and insightful review of the Bluebonnet Learning Destrezas fundamentales K-3 instructional materials. It was an honor to participate in the State Board of Education's (SBOE) 2025 Instructional Materials Review and Approval (IMRA) process.

We are pleased that the Aprendizaje Bluebonnet Destrezas fundamentales K-3 instructional materials were recognized for ensuring 100% coverage of the Texas Essential Knowledge and Skills (TEKS) required for the IMRA phonics review. We are also proud of the high performance achieved on both the IMRA quality rubric and the suitability rubric.

Aprendizaje Bluebonnet Destrezas fundamentales K-3 instructional materials are designed to address student learning using research-based instructional strategies to ensure students are receiving explicit instruction to develop and grow their Spanish literacy skills.

The Destrezas fundamentales lessons are systematically sequenced in Spanish so that the material progresses gradually from less complex to more complex. Within this sequence, students engage in explicit and intentional opportunities to practice the foundational skills in isolation and through authentic Spanish decodable text. Through this explicit, systematic instruction, students build their foundational literacy skills that support the practice of reading. As students build their literacy skills, they apply these skills within grade-level appropriate texts to acquire knowledge coherence, new vocabulary, and reading response skills.

In Grades K–2, the Destrezas fundamentales units focus on comprehensive instruction in foundational literacy skills aligned to grade level Spanish TEKS, including oral language, print concepts, phonological awareness, phonics, word recognition, and fluency. In addition, vocabulary development, conventions of Spanish, syntax, spelling, grammar, reading comprehension, and writing instruction are key components of the Destrezas fundamentales units. Students also receive explicit handwriting instruction with cursive instruction beginning in second grade.

In Grade 3, students develop foundational literacy skills through units that focus on language, phonemic awareness, sound-spelling patterns, and decoding and encoding multisyllable words. Vocabulary instruction is also embedded to build students' understanding around word parts, meaning, and academic and social language. Throughout the year, students will continue to develop their Spanish foundational reading skills to become independent readers of more complex texts.

For more information about Bluebonnet Learning Destrezas fundamentales K-3, refer to the Program and Implementation Guide. The team is committed to continuous improvement, with an ongoing effort to support teachers and improve student academic outcomes.
