

Curriculum Associates[®]

Supplement your mathematics program with instruction and practice that nurtures students to become active, real-world problem solvers. Students develop mathematical reasoning, learn “math talk,” and build solid mathematical habits through teacher-led lessons.

Ready Texas Mathematics is founded on research from a variety of federal initiatives, national mathematics organizations, and experts in mathematics. As a result, this program may be used in support of several instructional models. [Supporting research](#) shows the instructional strategies of *Ready Texas Mathematics*.

Ready Texas Mathematics Strengths and reasons to choose:

- Requires **higher-order thinking and complex reasoning** to solve multi-step problems and problems with more than one answer
- Integrates **Mathematical Process Standards** throughout every lesson
- Embeds thoughtful **professional development**
- Encourages students to develop deeper understanding of concepts and to understand and use a **variety of mathematical strategies and models**
- **Promotes fluency** and connects learning with clearly articulated models throughout
- Includes **open-ended practice items**

Curriculum Associates’ mission is to create high-quality instructional materials that help make classrooms better places for teachers and students. Throughout the submission process, we had a team working behind the scenes to ensure we provide instructional materials that deliver the highest quality to support teachers, ensure positive student outcomes, and comply with all Texas state requirements. Our commitment at the state level will continue at the district level from the beginning conversations of reviewing *Ready Texas Mathematics* to implementations and beyond.

We look forward to supporting Texas teachers and students with high quality instructional materials and service.
