A CUSTOM APPROACH TO THE TEXAS ESSENTIAL KNOWLEDGE AND SKILLS

A Flexible Supplemental Math Solution

Math Nation+ provides a flexible approach to curriculum that allows you to leverage this tool in the way that best meets the needs of your students that aligns with your instructional styles and preferences, without sacrificing quality. When you choose Math Nation+ , you are choosing a tool that serves as a comprehensive partner to help you deliver effective mathematics instruction, intervention and acceleration opportunities, personalized learning, additional skills practice, and assessment.

Courses Offered:

6th Grade Math

7th Grade Math

8th Grade Math

Algebra 1

Geometry

Algebra 2

Texas IMRA 2025 Publisher Response

We sincerely appreciate the state of Texas review committee for their comprehensive and thoughtful evaluation of our supplemental math product, Math Nation+. This product is designed to provide a flexible approach to curriculum to allow teachers to leverage the resources in the ways that best meet the needs of their students. We are proud of 100% alignment on the Mathematics Texas Essential Knowledge and Skills (TEKS) and all Learning Quality areas on the Quality Rubric—Depth and Coherence of Key Concepts, Balance of Conceptual and Procedural Understanding, and Productive Struggle. These scores are representative of our commitment to ensuring the products we create are 100% aligned, rigorous, and designed to meet students' needs. The primary reason this product did not achieve a 100% rating on some of the other areas on the Quality Rubric is that several elements included in the supplemental rubric extend beyond the typical expectations for supplemental instructional materials. These criteria are more appropriately aligned with the design and implementation standards of comprehensive core curriculum products rather than supplemental resources.

The positive feedback you've shared reinforces our dedication to crafting top-tier educational materials that promote impactful learning experiences for students. Your evaluation not only highlights the strengths of our program but also serves as a valuable resource for our ongoing refinement, ensuring we continue to meet the diverse needs of both educators and students in various learning settings.

Alignment to Standards

Our primary objective is to ensure that our curriculum not only addresses key academic content but also enhances students' understanding and ability to apply their knowledge. By closely aligning with grade- and course-level standards, we aim to equip students with the skills and competencies they need to excel both academically and in life.

Focus on Rigor and Depth

We recognize that promoting deeper learning goes beyond surface-level engagement with content. It requires students to explore complex ideas, think critically, and apply their knowledge to real-life scenarios. We've worked tirelessly to develop a supplemental product that balances conceptual understanding, procedural fluency, and real-world application. Your evaluation confirms that our approach is effective in helping students tackle challenging material in ways that foster mastery and long-term understanding.

This real-world relevance is crucial in preparing students for the demands of college, career, and life in a globally connected world. Your feedback strengthens our commitment to providing educators with the tools and resources that nurture these essential skills.

Instructional Supports and Teacher Resources

Supporting educators is central to our mission to be the most trusted provider of evidence-based STEM resources that cultivate critical thinking, collaboration, and curiosity. We understand that teachers play a critical role in student success, and we strive to provide them with the resources they need to implement the curriculum effectively. The positive evaluation of our materials validates our belief that clear, accessible, and practical teacher supports are vital for successful classroom execution. From teacher preparation videos specific to every lesson to formative assessments and scaffolding built directly into the student-facing materials, we aim to empower educators to address the needs of every student.

Differentiation and Accessibility

Ensuring that all students, regardless of background or ability, have access to high-quality education is a fundamental principle of our work. With supports embedded for English language learners and students with disabilities, along with enrichment opportunities for advanced learners, we've crafted a program that is inclusive and adaptable.

Your positive feedback on the accessibility of our materials reaffirms our commitment to educational equity. We recognize that each classroom is diverse, and it is our responsibility to equip teachers with resources that cater to the unique needs of each student. Going forward, we will continue to prioritize differentiation and accessibility as key elements of our curriculum.

Conclusion

We remain committed to fostering innovation and excellence in education. Together, we can continue to empower educators and inspire students to reach their full potential in mathematics and beyond. Thank you for your partnership in supporting high-quality learning experiences for all.
