McGraw Hill appreciates the opportunity to respond to the Instructional Materials Review and Approval (IMRA) report for *Texas Math*. We are pleased that the Math IMRA review has recognized the high quality of the McGraw Hill *Texas Math* suite of programs, including 100% TEKS and ELPS alignment.

McGraw Hill *Texas Math* makes math real for students, both in the classroom and beyond, while it serves to prepare students for success on state assessments. The program was developed to integrate Texas-based places, examples, and scenarios highlighting the connection between the mathematical ideas students are learning to familiar places, situations, and experiences in their daily lives. *Texas Math* is designed to empower teachers to teach math, engage every student, and develop a classroom of critical thinkers. *Texas Math* cultivates a spirit of discovery that empowers students to master the TEKS and develop a lifelong love of learning.

McGraw Hill *Texas Math* is grounded in a TEKS-aligned scope and sequence that provides teachers with flexible options to differentiate instruction and modify pacing to fit their classroom and scheduling needs. With supportive guidance throughout, teachers can facilitate student-made connections across math concepts and build understanding and use of mathematical language. Robust assessment strategies and teacher support are included with the materials and are universal within the McGraw Hill platform. Parent and caregiver resources are included to help support student and family engagement with digital technology and success with math learning.

As a leader in math education, McGraw Hill strongly values our longstanding partnership with the State of Texas and with districts across the state. This shared commitment ensures that students and teachers have access to the highest quality materials. We appreciate that the quality of our made-for-Texas programs has been recognized and are prepared and committed to support McGraw Hill *Texas Math* and answer any inquiries regarding the Instructional Materials Review that may facilitate your district adoption, evaluation, and implementation process.
